

STEPHEN FINKEL PHOTOGRAPHY

Hanimex 35ES

The Hanimex 35ES camera is small, light and compact with a Plastic body. The 35ES is a simple camera with the only adjustments being the sensitivity (100, 200 or 400 ISO) and the powering of the flash. The lens is a fixed 35mm lens with a manual wind and rewind (rewinding is done by the lever located on the top of camera)

The built in flash is powered by 2x AAA batteries and has a flash ready light upon the rear of the camera next to the viewfinder.
